

ARKANSAS ROCKHOUND NEWS

MISSION STATEMENT

The Central Arkansas Gem, Mineral and Geology Society is dedicated to promoting interest in mineralogy and the related sciences, interest in lapidary and the related arts; to encourage field trips and the enjoyment of collecting and preserving minerals as they occur in nature, and the study of geological formations, especially those of our Natural State of Arkansas.

We are a small group of people that enjoy getting together to share our common interests.

Regular meetings are at the Terry Library 6:30 PM on the fourth Tuesday of the month (except December)

Terry Library is located at:

2015 Napa Valley Dr.
Little Rock, Arkansas
72212

MARCH 2018

From the president...

Spring is coming our way with showers and sunshine. It is a great time to get out and see our world through fresh eyes and new wonder!

It was a great time at our February meeting with the auction. I know we had some great items up for bid. There were a couple of nice bidding wars, some surprises along the way. I enjoyed the beautiful crystal from the box Brandon and I split. We did have one piece that may have gone home with the wrong new owner. Daniel purchased a large calcite crystal from Midwest Lime in Batesville and it seems that it did not go home with him. Please take a look.

The Memphis Gem Show is coming up next month, I am still looking for give away for the show. Soon after is our Spring Rock Swap, on Cinco de Mayo at Burns Park. Field trips, if you are on Facebook, like our link and plan an event.

We are looking for someone to take on the responsibility of taking on as 2nd to the Annual Gem Show. John is unable to continue next year so this is a fabulous time to learn what needs to be completed for the show to be coordinated. We Need You!

See you at the Dig!
Barbara

Meeting minutes...

January 23, 2018

by Barbara Champagne

The 1st meeting of 2018 was opened at 6:30 pm by President Barbara Champagne. 25 Members attended and were welcomed along with visitors and potential new members Kelsey and Robert Cramer, invited by John S.

Minutes from the November meeting were unavailable so a motion was made to table them until the next meeting where they can be read and voted on.

Recent losses to the club were recognized with the passing of George Gray Major, Carl Hill and Ernie Confer. We will miss their contributions to our club, annual show and our lives. Rest in Peace friends. A motion was made to send a \$50.00 donation to the Pulaski Humane Society in their name as a remembrance so that the donations can be sent immediately. The motion passed.

Treasurer Report:

Treasurer Sarah Dotson reported that the club is solvent. She also reported that the annual audit was completed by Virginia W. and Pat K. A motion was made, seconded and passed that the audit findings were accepted. Sarah reported that the dues to the National Federation were paid and the subscription to Rocks and Minerals magazine was a bit difficult but she was able to resolve our subscription for this coming year. Anne Austen was thanked for hosting the Holiday Party in December. There were quite a few member in attendance. A camo hoodie was forgotten and is in the care of Barbara. It was decided it was possibly Brandon's (it wasn't) so there is still a lost and found item in Barbara's care.

Show Report:

John S gave a quick update. He has signed CAGMAGS show up on the Xpo Press website and services to help publicize the annual show in October. He will have more information at the April Meeting.

Field Trip:

David H was not able to attend the meeting, but Amy T. and Autumn L. have invited us to come

to their property in the Bauxite/Sardis area to surface search for rocks on February 10th at 10 am. They are working on creating some garden areas but the rocks are everywhere. 20524 S. Alexander Road, Alexander. Weather permitting.

Membership list:

A discussion on the flash drive that George Gray Major was had and determined that the drive was empty and information was still on his computer. Mike Howard and his son will be getting with Anita to access the computer to get the list from the hard drive. Mike has also graciously accepted the responsibility to keep the list updated. Sarah will provide Mike the list of those who paid dues, Mike will update the list and ensure that Nikki H. has the email information for newsletter distribution. He requested that if you change your email or need a hard copy sent to your home you contact him. He prefers to work via email. Also, he will provide contact information only on request. It was mentioned that in addition to Nikki H getting an updated list, that John S and Barbara C would also need this updated list as changes are made.

Old Business:

Bill A brought up the display case project. He stated that it would cost approximately \$30 per case in Plexiglas and \$30 per case in wood and supplies. It was mentioned that the current Display Expert (Brandon H, who has bragging rights for the 2018 year) would need to be able to contribute to the conversation. The discussion was tabled until the next meeting.

The Rock Swap, scheduled for May 5th at Elder Johnson Pavilion, Burns Park was discussed. Barbara stated that she would be willing to oversee the organization of the event. She asked for volunteers to help put up signs and invite vendors and club members to participate. Several people came forward to assist her. It was noted that her name was submitted to the Federation as the contact for this event.

New Business:

President C. presented an idea for a "T-shirt contest" for the club. All submission must be presented at the February 27th meeting for publication in the newsletter with a vote on the March 27th meeting to select a winner. All submission must be on a standard piece of paper, if you have a front and back, you must use 2 pieces of paper. The T-shirt's can then

be printed and for sale to club members at cost. This may also offer an opportunity for the club to sell these with an increase in price at the 2018 October Gem & Mineral Show.

The GSA meeting in March was discussed. Dr. Mike DeAngelis had mentioned several months ago that he would like our assistance if possible. Barbara asked club members to keep the dates of March 9th through the 13th open and if possible volunteer in any capacity that they may need us for. Barbara will contact Mike to see what was needed and bring it to the February meeting.

Other upcoming important dates were mentioned:

April 28th & 29th Memphis Mineral, Fossil, and Jewelry Show at the Agricenter, 7777 Walnut Grove, Memphis Tennessee.

May 5th, CAGMAGS Rock Swap, Burns Park North Little Rock Arkansas

May 12th, Quapaw University at University of Arkansas Little Rock for the Boy Scouts.

Mike Howard was in contact with some guests coming to Arkansas from the Washington DC area, he was nice enough to extend an invitation to see his collection and talk to them about Rockhounding in Arkansas.

Next month's program: AUCTION! *5 items per person to sell, 10% goes to the club, bring your allowance, or your checkbook!

The meeting was adjourned, the raffle then commenced.

The topic for the program as a session of "Ask Mikey", Mr. Howard conducted a question and answer session about quartz, Japan law twinning and other areas of interest by club members.

February 27, 2018

by Daniel Butcher

The February meeting was opened by club President Barbara Champagne, with 24 members present.

The first order of business was approval the January meetings minutes. The motion was approved by all members. John Schoeneman

gave the group bad news. Due to medical problems, he will no longer be the show chair, and will be actively seeking someone to take his place. Our prayers are with him and his family.

Mike Howard is doing the membership accountability now. If your names not on his list, then your dues aren't paid for 2018.

The GSA South Central Meeting is coming up in early March. Our annual rock Swap is on May 5. The Memphis show will be April 28 & 29. We need rockhounds to donate material for the booth at Memphis. Mike mentioned that the Hot Springs Club needs new members. They have been in business for 45 years, and now there numbers have fallen. Mike makes a good point about club members willingness to volunteer. If members don't step up and volunteer, our club could experience a decline seen in other groups.

Meeting is closed and auction begins.

From the editor...

Happy Spring! Hopefully we're headed toward some warmer temperatures (not too warm though) and nice weather as spring begins. What plans to do have for the springtime? Hopefully some of you will go on some hounding adventures and come back to share with us what you found!

For our house, spring means baseball season! It's a busy time and we love it! We do hate to miss meetings though and we will, but luckily we have the swap coming up on the 5th of May so we'll see everyone then. Brandon has a big week that week; the 3rd is his birthday (he'll be 10! How??!!), the 4th he has his class field trip, the 5th our swap and the 6th will be his birthday party. Hopefully we will have beautiful weather for all of it! He's pretty excited.

Don't forget to check out the t-shirt designs, we will be voting at the meeting!

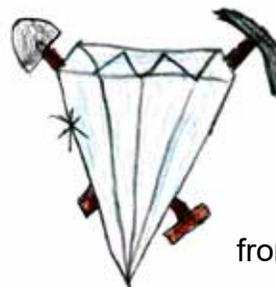

As always, please send me any news, articles or photos you would like in the newsletter. Thanks!

Club news...

T-shirt contest!

Here are the entries received for the contest. Which is your favorite? A winner will be picked at the March meeting!

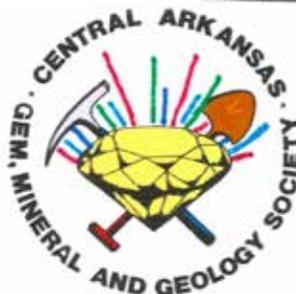

1 Central ARKANSAS
Rock & Mineral
Club

front of shirt

2 The yellow diamond as our club symbol, was selected because the "Crater of Diamonds" is known for its yellow diamonds. The diamond is Arkansas's official state gem, and many Americans associate diamonds with Arkansas, making it readily recognizable at a simple glance.

The t-shirt design further adds the outline of our state, with most of the counties readily visible, and both Federation's symbols are also visible.

To the left is the patch design

Brad's bench tips...

MODIFYING PLIERS

Pliers-1

Sometimes a few changes to your tools can make work go faster and improve the quality at the same time. Stock tools need to be polished and can be customized using standard jewelry skills.

Here's an example:

While making a lot of chainmaille, I noticed I was ending up with a few scratched jump rings that required extra cleanup time before the chain could be polished. So I started looking into what I was doing wrong.

Making jump rings and weaving them into chainmaille designs involves a lot of opening and closing of the rings. I typically use two square jaw pliers to do this, one for each hand. The jaws of my pliers were pretty much scratch free because on a new tool I typically relieve any sharp edges, sand away any tool marks on working surfaces and give those areas a quick polish.

Pliers-2

That helped but was not the whole problem. While making chain, rings would sometimes slip out of the pliers or slide within the jaws as I was trying to twist them open or closed. I noticed the jaws close at an angle, and gave me the idea of forming a groove at the end of the jaw that would grasp the ring gently without scratching it. Not only have these pliers worked well for chainmaille, but I've found several other problem jobs that this modification solves very nicely.

Pliers-3

To make up what I needed, I bought two inexpensive sets of square jaw pliers. My preference is for jaws that are about 3.5 - 4mm wide. This provides a good fit for the jump rings I use. You need to have enough metal at the tip of the jaws to be able to cut a groove that's deep enough. If your plier tips are too thin, you'll have to cut them back. Locate and mark the position on the jaw where the thickness is about 1.6 - 2mm.

Pliers-4

Cut the tips off with a cutoff wheel or grind them off with a bench grinder. If using a cutoff wheel, be sure to brace and hold both the workpiece and the rotating handpiece securely. If either moves, you will break the abrasive disk. And remember when cutting any metal with a motorized tool, be sure to use good eye protection. A little piece of debris in your eye makes for a bad day.

Pliers-5

Cut the tips off with a cutoff wheel or grind them off with a bench grinder. If using a cutoff wheel, be sure to brace and hold both the workpiece and the rotating handpiece securely. If either moves, you will break the abrasive disk. And remember when cutting any metal with a motorized tool, be sure to use good eye protection. A little piece of debris in your eye makes for a bad day.

You are really needed!

by Donna Moore, MWF Secretary (April 2018 News)

If anyone knows someone associated with our hobby (should be a club member, but we can always get them to join a club) who might consider taking the MWF Insurance Chairmanship, please let David Root know so he can contact them to offer the job. Marge Jensen has done an excellent job, but she has asked to resign and gave us till March 1 to find a new chair. Well, March 1 has passed, so we desperately need a new insurance person.

The person who chairs this committee is a go-between for the clubs and the insurance company. He or she is also involved in fielding questions and trying to solve problems associated with the insurance. He or she must be able to get along with the members, who often wait too long to apply for insurance for shows or events, or have other problems that must be taken care of. And he or she must be able to "talk insurance" with the insurance company.

We have some other chairmanships that need to be filled, but this one is of the utmost importance. The person does not need to have served on the MWF Executive Committee before, but must be a member of a club whose dues are paid for 2018. (We can try to get this taken care of, if this is an issue.)

MWF President David Root's e-mail address is d-root@comcast.net and his phone number is 616-498-4699.

Pliers-6

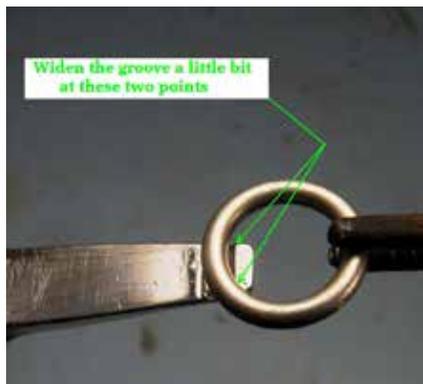

Now to make the grooves round so they grasp the wire without distorting it, I close the jaws and run a drill through the opening formed by the two rough grooves. I start with a small drill and followed up with a drill just slightly smaller than the wire size I want to grip. In my case that was 14 gauge wire, so I chose a #53 drill.

Finally, the shape of the grooves needs to be refined. I used a coarse, knife edge, silicone polishing wheel on the flexshaft to polish off all marks left by the drill and to round off the outer edges of the groove.

Pliers-7

Test for proper fit by laying a jump ring into each groove. In particular, inspect the way the edges of the groove contact the inside of the ring. You may need to widen the groove at this point to avoid the pliers leaving a nick. Do a final polish so the jaws will not scratches as they grip a ring. I used a medium grit, knife edge, silicone polishing wheel but a sewn buff with tripoli or Zam would also work well.
